Print "Click 3 & Lucas Sequence"
Input a
a == "1" or "1"
Yes
No
a == "2" or "2"
Yes
No
a == "3" or "3"
Yes
No
Print "Incorrect choice. Try again"
Print "Enter the number of your desired range"
Input n
Print "Enter last number of your desired range"
Input p
Let even_numbers = 0
Let odd_numbers = 0
Let prod_even = 1
Let prod_odd = 1
Let i = 0
Let triangular_num = 0 * i+1/2 *
Is triangular_num greater than p?
Yes
No
Print Even numbers
even_number
Print Odd numbers
odd_numbers
Print Product of Even Triangular
prod_even
Print Product of Odd Triangular Numbers=
prod_odd
Do you wish to continue with another task?
Yes
No
STOP
Is triangular_num is odd or even?
Yes
No
Is triangular_num mod 2 equal to 0
Yes
No
Print triangular_num is even
Add 1 to even_numbers
Multiply prod_even * triangular_num
Print triangular_num is odd
Add 1 to odd_numbers
Multiply prod_odd * triangular_num
Add 1 to i
Enter n
Enter n
Enter n
Enter p
Enter C_range
Enter C_range
Stop
Do you wish to continue with another task?
Yes
No
Let i = 0
n_product = i * i+1 / 2
Is n_product <= p
Yes
No
Is n_product in sequence of p
Print n_product is in sequence of p
Print n_product is not a factor of p
Add 1 to i
Is i (n+1)
Yes
No
Enter C_range
i = i_range
Is i less than or equal to i_range?
Yes
No
a0 = first_term * last_term
Is a0 mod n = 0?
Yes
No
a0 is not a multiple of n
Print a0 is a multiple of n
Do you wish to continue with another task?
Yes
No
Stop
last_term = term
Is i <= i_range?
Yes
No
first_term = term
Is i <= i_range?
Yes
No
add 1 to i
term = (a * (i-1) + (i-1) * (i-1) * d)
